

# Sweetheart Ring

Make your strips of peyote the same length as the ring size lines below for an easy fit!

## Ring Size Lengths

**Instructions:** Work up a strip of peyote your desired length. The heart can be worked in at any point. Ending on an opposite kind of row as the one you started (for example: if your beginning row has the top corner bead as being an “out” bead, make sure the row you end on has the last bead you stitch on as being an “in” bead), zip up the strip of beadwork by going into the “out” beads on each end, locking the beads together and making your ring seamless. Voilà! You have an adorable little ring to keep or to give!
